Components for abandonment (circle all that apply):

Septic Tank                  Hollow Leaching Structures (galleries, drywell)                  Cesspool

Components/structures emptied and removed by a cleaner licensed pursuant to CGS Chapter 393a? Yes \_\_\_\_\_ Date \_\_\_\_\_ Not necessary \_\_\_\_\_

Technical Standards for Subsurface Sewage Disposal Systems, Revised January 1, 2007, II D. System Abandonment: Abandonment of subsurface sewage disposal system components (i.e., septic tank, hollow leaching structures) or cesspools shall be performed in such a manner as to eliminate the danger of the system components or structure inadvertently collapsing. The responsibility for abandonment lies with the property owner. Structures that are to be abandoned shall be emptied of all sewage/wastewater prior to abandonment. Structures shall be filled with sand, gravel, or crushed, and the area backfilled with clean soil.

Signature of Owner/Authorized Agent: \_\_\_\_\_
